Bsc (Hons) Computing

Institution: Islington College - 2022

WORK EXPERIENCE

Laravel Developer | CodeIT Appsware

May 2023 to November 2024

Skilled Laravel developer with strong experience in building scalable, efficient backends, leveraging Laravel's powerful features like Eloquent ORM, RESTful API development, and authentication. Adept at integrating Flutter front-end applications with robust Laravel backends, ensuring smooth communication between mobile apps and server-side systems. Proficient in using GetX for state management in Flutter and deploying apps to the Google Play Store. Focused on delivering high-quality, scalable web and mobile solutions with a deep understanding of both Laravel's backend architecture and Flutter's mobile development ecosystem.

Laravel Developer Intern | CodeIT Appsware

January 2023 to April 2023

Contributed to Laravel-based projects, integrating Flutter front-end applications with Laravel backends to ensure seamless data flow and API communication.

PROJECTS

SmartGau

Developed SmartGau, a grocery shopping app, using Flutter and Laravel. Uploaded the app to the Play Store. • API for mobile app, Admin template using blade technology. • Advanced Search, Multi User Authentication
